MEMORANDUM

TO: Potential Vendors
FROM: Cyrus Minoofar
SUBJECT: Alameda County Incident Management Project
Project No. 01-05 – GPS Functionality
DATE: February 28, 2005

This memorandum is issued and distributed to potential vendors to clarify the GPS functionality requirements for the project.

As stated during the pre-bid meeting, the ACCMA is expecting to use Sierra Wireless MP 775 modems with built-in GPS functionality. The ACCMA is envisioning that the Sierra Wireless MP 775 modems will use an external antenna for the GPS and the wireless WAN connectivity.

However, if the vendor wants to use an alternative GPS source (in addition to the Sierra modem), this option is also acceptable.

This clarification will become a part of the Contract Document.
